### CS 215: Data Interpretation and Analysis

Sunita Sarawagi Autumn 2024

Welcome

### What is the course about?

# Suppose you want to find reliable answers to questions:

- Which minor should I opt for?
- What are the types of future careers that IITB graduates favor lately? 0
- How many students seats should IITB allocate to each department? 0
- Which products are likely to be in high demand next month? 0
- Is rainfall in Mumbai becoming more erratic lately? 0
- Is inflation increasing at a faster pace in recent times? 0
- How is supply of drinking water keeping pace with increasing population? 0
- Is a flu vaccine useful to prevent frequent cold&fever? 0

## How do you find the answers?

- Go by your existing vague impressions
- Ask your peer group, Ask older experienced people
- Do a websearch
  - Ask ChatGPT

## The data scientists approach

- Go to an authentic source that has recorded correctly the observed values over time → This is your data
- Public data: World bank datasets, Datacommons, National Data Analytics platform, Stock prices
- Enterprise data: Student data in universities, sales and customer interaction data in enterprises 0
- Scientific data: experiments, simulations and observations in lab
- Try to find answers from the data →How?
- This course will teach you how to get answers to top-level questions from data in a scientific way.

## Several sources of public data in India

Image from data gov.in

## Some example studies on Indian Data

- Power consumption in India
- Health of Indian population
- Housing in India

#### Course contents

- Data analysis: gathering, summarizing, and visualizing data in intuitive ways
- Probability: Mathematical tool to represent uncertainty
- Statistical inference: Drawing probabilistic conclusions from limited data

Important pre-requisite for future courses in machine learning, image processing, computer vision, deep learning, AI, finance, etc..

## Mode of running the course

- Three 55 minute slots per week:
- SAFE/Moodle/paper quizzes on the material covered in prior weeks
- 20 minute duration at a pre-announced time or 55 minute quiz.
- Grading will be done on top n-2 out of n quizzes for 20 minute quizzes.
- No compensation for missed quizzes.
- All materials will be uploaded on Moodle, announcements via Moodle, questions on Moodle or cs215-ta@googlegroups.com
- Course webpage

#### Evaluation

### Approximate credit structure

- 15% In-class Quizzes
- 25% Mid-semester exam
- 35% End semester exam
- 25% Programming and written homeworks: in teams (about 5 assignments)
- Attendance mandatory. Students with less than 80% may get a DX.

We will all adhere to principles of academic honesty. Penalties for violation will be severe and will be reported to DADAC. Givers and takers are equally responsible.
